

## Training Schedule October 2002 - May 2003

**M**ore than 5,500 people have attended TrenchSafety's training programs since they began six years ago. We are committed to helping construction professionals learn about the procedures, the equipment, and the techniques that can reduce on-site injuries...and even deaths.

Further, we can show you ways to increase **on-site crew efficiency that will reduce your costs**, and add to your bottom line.

This year, **we've added a new, invaluable safety course**, this one for those of you in the **roadway construction industry**. The OSHA-accredited, 10-hour course has been developed jointly by the American Road & Transportation Builders Association (ARTBA) and the National Safety Council. Details about the course and our schedule are on page 2.

Another valuable series of all our other safety classes is also scheduled at locations throughout the Mid-South.

Contact TrenchSafety and Supply with any questions or to enroll your crew members.

### Training Class Details...

'Competent Person' Training . . .	1
Roadway Construction Safety . .	2
Confined Space Training . . . . .	3
Motorgrader & Asphalt Pavers. .	4

## "Competent Person" Training

OSHA requires that a "competent person" be on your construction or maintenance site when workers are exposed in an excavation.

Applied to trenching or excavation operations, the Competent Person (CP) must have specific training and be knowledgeable of the requirements of the standard, soils analysis, and use of protective systems. The CP must also have authority to make immediate corrective measures to eliminate any

unsafe conditions. TrenchSafety and Supply's Competent Person Training Program, approved by the National Utility Contractors Association (NUCA), is designed to help you meet OSHA's training requirements.

The one-day sessions run from 8:30 a.m. to 4:30 p.m. Cost is **\$95 per person**, and includes

lunch. Each student

receives an instructional workbook that will serve as a valuable reference later, and a wallet card and certificate from NUCA signifying completion of the course.

"The instructor did a great job."  
**OSHA Compliance Officer**

**This safety class is approved by the National Utility Contractors Association.**

### "Competent Person" Classes

- Tuesday, Oct. 22 – Little Rock
- Tuesday, Oct. 29 – Memphis
- Tuesday, Nov. 5 – Little Rock
- Tuesday, Nov. 19 – Memphis
- Tuesday, Dec. 3 – Memphis
- Tuesday, Dec. 10 – Little Rock
- Tuesday, Jan. 21, 2003 – Memphis
- Tuesday, Jan. 28 – Little Rock
- Tuesday, Feb. 18 – Texarkana, Ark.
- Tuesday, Feb. 25 – Little Rock
- Tuesday, Mar. 4 – Gulfport, Miss.\*
- Tuesday, Apr. 1 – Memphis
- Tuesday, Apr. 22 – Jackson, Miss.\*
- Tuesday, May 6 – Memphis
- Tuesday, May 27 – Fort Smith, Ark.

\* Sponsored by Mississippi Associated General Contractors. Contact Miss. AGC, (601)-981-1144, for more information and to register.

Trench Safety Announces...

## New OSHA-Accredited Safety Program for Roadway Contractors

TrenchSafety is pleased to announce a new course: An OSHA-accredited two-day, 10-hour training program exclusively for the roadway construction industry. The American Road & Transportation Builders Association (ARTBA) and the National Safety Council developed this program that is designed to fit the needs of the roadway construction industry. Topics covered will include:

- Introduction to OSHA
- Roadway Work Zones
- Personal Protective Equipment & High-Visibility Apparel
- Collisions
- Night Work
- Mechanized Equipment
- Electrical Safety
- Excavations & Trenching
- Confined Spaces
- Fall Prevention & Protection
- Occupational Health & Environmental Controls

For a nearly a decade, ARTBA has worked to promote programs and safe work practices to reduce roadway construction accidents, and has developed a comprehensive Safety Management Manual for this industry. That manual, recognized by OSHA, has received considerable industry praise and recognition.

The National Safety Council is a not-for-profit, public service organization dedicated to the safety and health of all people. The Council's mission is to educate and influence society to adopt safety, health and environmental policies, practices and procedures that prevent and mitigate human suffering and the economic losses arising from preventable causes.

### Roadway Construction Safety Classes

**Tuesday-Wednesday, Jan. 7-8, 2003 – Little Rock**

**Tuesday-Wednesday, Mar. 11-12 – Memphis**

**Tuesday-Wednesday, May 13-14 – Jackson, Miss.**

The two-day sessions get underway each day at 8:30 a.m. and run to 4 p.m. Cost is **\$195 per person**, and includes lunch both days. Each student receives an instructional

manual that will serve as a valuable reference later, and an OSHA wallet card signifying completion of a 10-hour safety course.

TrenchSafety will offer the course starting in January. See schedule in the box above.

## Confined Space Entry Training

OSHA mandates that employers provide a safe workplace for their employees. Each year, thousands of workers who enter confined spaces—manholes, pipelines, sewers, utility vaults, etc.—face significant risk of injury or death because of limited openings, poor ventilation, or hazardous atmospheres.

Our Confined Space Entry training is designed to improve awareness of such hazards, while providing managers and confined-space entry supervisors with the basic information to establish a confined-space safety program. In addition, a wide variety of information on protective devices is presented.

The one-day training session begins promptly at 8:30 a.m., and ends at 3 p.m. The cost is **\$95 per person**, and

includes lunch, an instructional workbook, and a wallet card and certificate from NUCA signifying completion of the course.

### "Confined Space Entry" Classes

Tuesday, Nov. 12 – Memphis  
Tuesday, Feb. 4, 2003 – Memphis  
Tuesday, Mar. 18 – Little Rock  
Tuesday, Apr. 15 – Memphis

"Your classes present this important information in a clear, concise, easy-to-understand style."

## — Motorgrader Control and Asphalt Paver Control Training —

TrenchSafety and Supply also now offers classes on the safe and efficient use of laser-controlled motorgraders and asphalt pavers.

Company owners, estimators, project managers, superintendents, grader checkers, and machine operators will all benefit from the new courses.

Each topic will be covered in six hours: four hours of classroom time and two hours of actual "hands-on" use of the machines.

The course material, which applies to virtually all machine-control manufacturers, is based on classes created by Topcon Laser Systems, the world leader in lasers and machine control.

### Class Specifics

The grader training course will include a review of conventional methods of establishing and maintaining grades, operation of lasers and non-contact controls, and a "how-to" section on the use of these systems on various job site applications.

*Based on a course  
developed by*

The paver course will include a review of the basic principles of paving, operation of lasers and non-contact controls, and sonic averaging systems and applications.

### Classes to Meet Your Team's Schedule

The one-day session is offered specifically to meet your schedule. Contact TrenchSafety for details on cost and scheduling.
